Featured Article: Power BI Mobile App

On the go? Away from your office and your desktop? You can still access your Power BI reports on your mobile device and tablet.

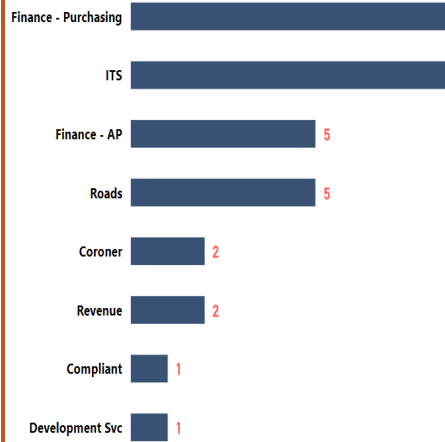

Power BI offers mobile apps for iOS, Android and Windows devices. With the Power BI App, you can connect to and interact with Power BI Reports from anywhere.

Success Story

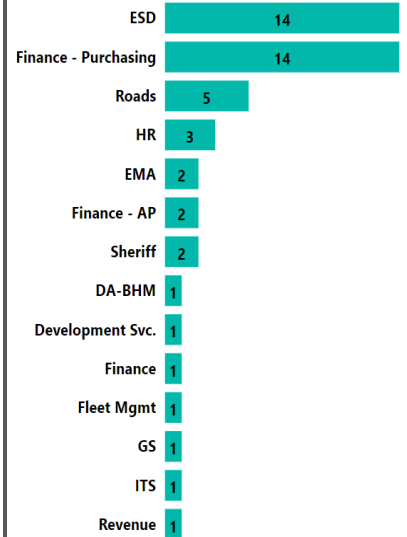

“ Power BI makes it easy for our staff to effectively generate reports that calculate metrics, graphs, and charts with a click of a button, and helps study trends in number of development permits and inspections over weeks, months, and years. Before Power BI, our team spent many hours each quarter manually compiling data into spreadsheets, while performing several levels of data manipulation to produce the quarterly KPIs metrics for the County Manager’s Office. We truly appreciate the close working relationship we have established with the ITS BI Team.” - Mondonna Movahed & Kathy Burleson, Development Services.
