 - Minimum of 6" thick
2. Place and utilize a covered waste receptacle on the construction site
 - Prevent rain and wind exposure
3. Install and maintain perimeter control devices to keep dirt on site during construction
 - Utilize silt fence or other methods

Silt Fence Guidelines

JEFFERSON COUNTY, ALABAMA

Erosion and Sedimentation Control Minimum Requirements

Article 13 of the Jefferson County Subdivision & Construction Regulations requires that dirt remain on the site.

In addition to the minimum requirements, the following practices are recommended to keep dirt on site:

- Phase in clearing the site rather than clearing the entire property at once.
- Use temporary/permanent stabilization on areas not being used for 14 days.
- Permanently stabilize the site as soon as possible.
